

INFORMATION

Covid-19

The Coronavirus has the official status as pandemic and of course we are obligated to follow the guidelines issued by the government. It is a task for the whole community to contain the spread of the virus. At Thermit we have worked on a set of guidelines for how we ourselves can prevent the virus from spreading while working.

Customer-visiting employees

1. Our customer-visiting employees will minimize physical contact and keep good distance when visiting.
2. We will disinfect the unit before the installation at the customer.
3. We will disinfect our hands before and after the customer visit.
4. We will use masks and single use gloves during the installation and service work.

Logistics center & operations

Our logistics center will work as usual and we do not expect any noteworthy disturbances of the daily operations. However, this requires that we know beforehand that we will be welcome at the customer and do not drive in vain, if there is a service to be performed.

Our storage has just been restocked, so we have all components available and will be able to deliver in the time to come.

Service team

Our service team will serve our customers in the best possible way, given the current situation we all are in. All our technicians are instructed carefully to show the necessary caution when on a service visit. They will all wear single use gloves during a visit. Our service hotline will still be active too, even though some of our employees will work from home. Nonetheless it will be possible to contact us as usual.

Intern employees

We try to only have 3 to 6 employees working at the office at the same time. Engineers and accounting are working from home.

Do you have any questions?

If you have any questions, please feel free to contact us:
- mail: salg@thermit.dk or by phone **+45 7026 6662**

Yours sincerely
